ROPEFLEX

ORYX - RX2500: VERTICAL ROPE TRAINER

DESCRIPTION

Ropeflex machines deliver the benefits of both isokinetic and aerobic exercise. Our rope-pulling machines are based on simple, time-proven principles of rope climbing while reducing the risk of this traditionally dangerous activity to nearly zero. Individuals of any age and athletic ability can benefit from our unique rope technnology safely and comfortably.

Ropeflex machines are based on maintenance-free magnetic technology. Our continuously adjusting resistance mechanism causes the rope pulling difficulty to increase with the rope pulling speed. Our patent pending technology allows you to customise the workout to match your fitness goals. Initial tesion can start as low as 10lbs and go up to 100lbs (on some models) for performance athletes or those who want to maximise resistance training.

Our rope pulling machines were designed with usability and flexibiity in mind. All machines come with instructions and illustrations of multiple exercises to maximise workout efficiency. Our high quality ropes allow a comfortable grip, limiting friction and slipping during the exercise activity.

STANDARD FEATURES

- Safe alternative to ceiling rope targeting strength and cardio development
- Durable design that easily fits anywhere
- Soft-braided rope for easy and comfortable grip
- Cushioned, supportive seat
- ADA compliant
- Pull resistance ranging from 10lbs-100lbs
- Available custom configuations for any specialised training or rehabilitation needs
