

DOIT

Air Move (SA)

New concept. New Era

PRODUCT SPECIFICATIONS

DISPLAY TYPE	LCD (with blue backlighted)
UNIT SIZE	142 x 62 x 214 cm
UNIT WEIGHT	100 KGs
MAX. USER WEIGHT	150 KGs

PRODUCT FEATURES

LCD screen

Multi Grips Accessories

Quick Snap Technology

3 Fan Positions

OTHER OPTIONS

Heart Rate Monitor Chest Strap

Key Features

The Air Move (SA) is a revolutionary fitness product offering smooth, natural airflow and magnetic resistance through its heavy-duty aluminum fan and steel blades.

It features a high-performance internal drive mechanism with adjustable magnetic resistance, allowing for intense training at 14 different levels.

Its ergonomically designed handle offers placement options for training different muscles. With a self-leveling pulley system and robust sealed cartridge bearings, the machine ensures stability and versatility with three different positions.

The Air Move (SA)'s main focus is enhancing athlete performance by improving muscle endurance, developing coordination, and increasing blood flow for recovery. It caters to gym novices, athletes, and elderly individuals alike, offering compound movements, explosive power training, and isolation exercises depending on the user's needs.

The low-impact nature of the machine makes it suitable for rehabilitation or those with injuries. Overall, the Air Ski Move (SA) is a game-changing fitness product suitable for users of all levels.

Functions

1. Three training positions: made to target a full-body workout
Top position: Ski, Lat Pulldown, Woodchopper, and Reverse Crossover.
Middle position: Boxing cardio, Cable Crossover, and Cable Row.
Bottom position: Front Delt Raise, Bicep Curl.

2. Unique upside-down design: A meticulously designed mechanism that can also function in upside-down positions, creating even more training options and possibilities.

3. Easily move between the three positions: The elastic system leads to smooth transitions. Users can easily change positions during their training sessions.

4. Quick Snap Technology: Depending on different training demands, users can switch to the suitable handlebar rapidly.

5. Magnetic system: An additional magnetic system offers more intensity options. With 14 levels of adjustment, it can satisfy various training requirements, from rehabilitation to athlete training.

6. Different models: Versatile options to satisfy customer needs: Wall Mounted(WM), Wall-mounted with Rail (WR), and Stand Alone with Platform (SA)

7. Safety: Air Move (SA) has passed the TUV S.A test and a hundred million cycle life test. The structure and mechanism have been strictly tested to prevent users from encountering danger.
